Windows Live Mail 2011

Other

OS X Mail

Thunderbird

Incredimail

Cell Phone (General)

*The above instructions will create a POP3 email account on your computer. If you wish to use IMAP to check your email, use port **143** for the Incoming Mail port.

***Avast Anti-Virus has been known to block some email clients from sending email. Click [here](#) to read the instructions that will resolve this issue.**

Webmail

If you do not find your email client here, or you do not have an email client on your computer, you can always use our [webmail](#) interface, available to any computer with an Internet connection.

Spam Filter Settings

Your MUSFibernet.com email is now protected by our Red Condor spam and virus filtering system. Mail sent to you will be automatically filtered before it arrives in your inbox and the spam will be stored in an online quarantine. You can safely view your quarantine anytime you like without risk from fraudulent and dangerous email. Please read the [Welcome Letter](#) for more information and how to access the Personal Dashboard.

Below are links to documents to help guide you through the Personal Dashboard:
